

⚠️ Challenges: Shadow IT, tool overload and resource strain

Device Sprawl & Shadow IT

- Shadow apps bypass controls
- BYOD limits visibility scope
- Unmanaged endpoints, apps grow over time

Tool Fatigue & Overhead

- Siloed tools create drift
- Manual tasks increase fatigue
- Redundant workflows reduce efficiency

Budget & Time Constraints

- Audits demand continuous oversight
- Regulations evolve without pause
- Enforcement gaps risk penalties

🛡️ Kitecyber Approach - Unified Edge Control

One Agent. Total Control.

- Discovers shadow IT instantly
- Enforce security & compliance controls
- Supports Mac, Windows & Linux

Security with Automation

- Enforces policies continuously
- Automates patching workflows
- Integrates with compliance stack

Zero-touch Deployment

- Syncs users from IDP
- Automates device onboarding
- Eliminates manual provisioning

🔗 Use Cases

- 🛡️ **Effortless IT Operations:** Automate patching; Managed password enforcement; Access without VPN
- 🛡️ **Ransomware Protection:** Prevent insider threats; Manage disk encryption; Secure unmanaged endpoints
- 🛡️ **User Experience Management:** Accelerate onboarding; Standardise BYOD configurations; Remediate performance issues
- 🛡️ **Compliance & Audit Readiness:** Map controls to frameworks; Automate evidence collection; Integrate GRC solutions

Next-Gen SaaS, Gen-AI & Internet Security
