

IPM+ Policy & Compliance

Ensuring adherence to key organizational standards

IPM+ Policy & Compliance Overview

Executive Overview

Comprehensive Compliance Policies

Includes over 900 pre-built policies covering diverse compliance requirements and CIS alignment.

Real-Time Auditing

Continuous system monitoring detects deviations and enforces corrective actions automatically to reduce manual effort.

Multi-Platform Support

Supports Windows fully and Linux and macOS partially, enabling flexible management across IT environments.

Enhanced Enterprise Efficiency

Automated compliance and governance reduce manual monitoring and improve operational efficiency.

Core Capabilities

Key Capabilities

Custom Policy Scripting

Custom scripting enables tailored compliance rules beyond standard frameworks to meet unique organizational needs.

Real-Time Audits

Continuous real-time audits provide immediate visibility into compliance status and deviations to prevent risks.

Automated Enforcement

Automated enforcement corrects configuration drifts and reapplies policies, enabling a self-healing compliance model.

Enterprise Governance Strengthening

These capabilities reduce manual efforts and errors, enhancing regulatory posture in complex IT environments.

Data Loss Prevention (DLP) Features

Device Control

Device control restricts unauthorized peripheral use to prevent data transfer via removable devices.

Application and URL Blocking

Blocking applications and URLs restricts access to harmful or non-compliant digital resources.

Screen-Capture Blocking

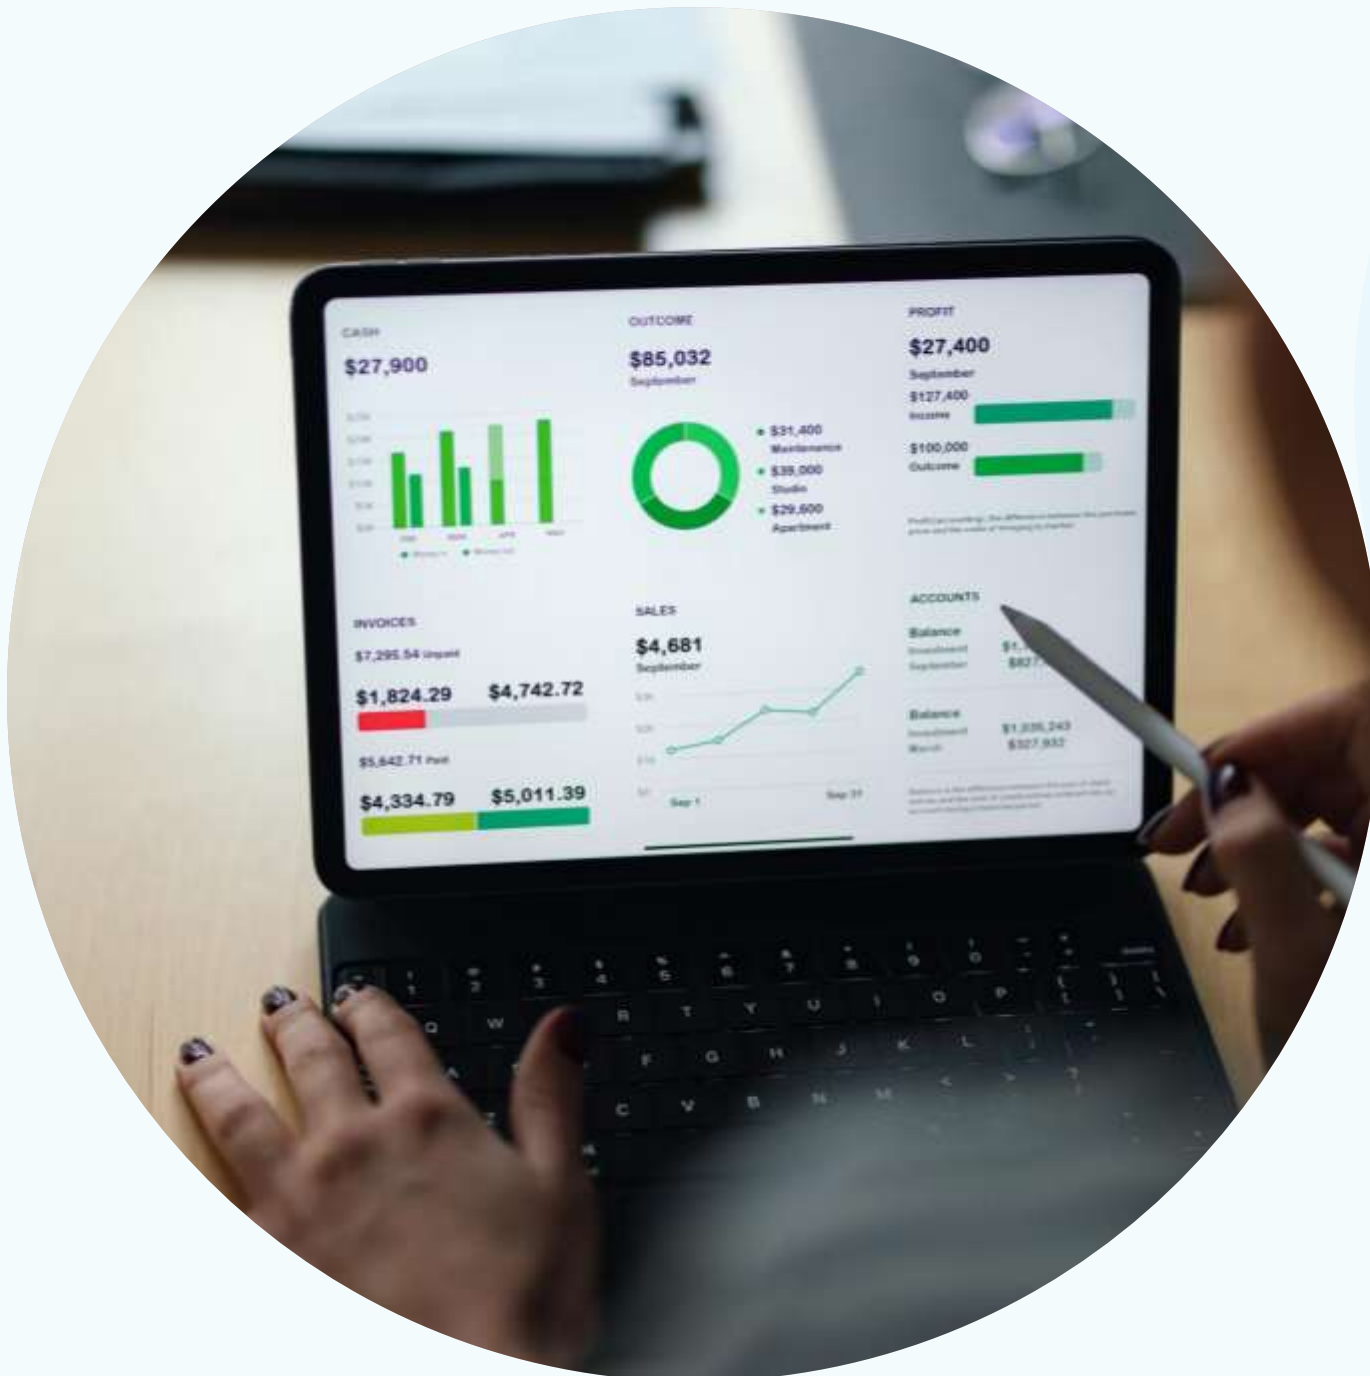

Screen-capture blocking prevents leaks of sensitive information through screen grabs.

User Login Lock/Unlock

User login lock/unlock ensures only authorized users gain access to secure systems.

Compliance Automation & Monitoring

Remediation & Monitoring

Continuous Compliance Monitoring

The system continuously monitors device states against compliance baselines to detect deviations promptly.

Automated Remediation Actions

Automated remediation applies corrective actions or escalates issues based on predefined workflows to ensure quick resolution.

Operational Efficiency and Risk Reduction

Self-correcting environments reduce manual workloads and minimize configuration drift, enhancing operational efficiency.

Dashboards & Reporting

Real-time Compliance Visibility

Dashboards provide leadership teams with real-time insights into organizational compliance levels for proactive management.

Insightful Audit Consolidation

Dashboards consolidate key audit findings and trends ensuring stakeholders understand risk and regulatory readiness.

Actionable Decision Support

Reporting tools empower decision-makers to prioritize remediation and allocate resources effectively over time.

Transparency and Accountability

Comprehensive reporting supports transparency and accountability across governance and operational functions.

Platform & Business Value

Platform Support

Comprehensive Windows Support

The platform provides full support for Windows, ensuring seamless governance in prevalent enterprise environments.

Partial Linux and macOS Support

Partial support for Linux and macOS enables governance across diverse operating systems in hybrid IT ecosystems.

Unified Governance Across OS

Cross-platform capabilities reduce policy fragmentation and ensure consistent rule enforcement enterprise-wide.

Value for Digital Transformation

Multi-platform support is crucial for organizations embracing digital transformation and hybrid IT models.

Business Benefits

Enhanced Security

Proactively prevents unauthorized access and data leakage, reducing misconfiguration risks effectively.

Operational Efficiency

Automated enforcement minimizes manual compliance tasks, allowing IT teams to focus on strategic priorities.

Scalability and Performance

Ensures consistent and reliable performance across large enterprise deployments and diverse industry sectors.

Robust Reporting and Governance

Improves regulatory alignment and strengthens governance maturity through comprehensive reporting and audits.

Target Verticals

Industries Served

BFSI Compliance Support

Enhances regulatory adherence and security for financial institutions, supporting key compliance frameworks.

Public Sector Governance

Provides centralized governance and audit readiness to ensure transparency and compliance with government standards.

Educational Institution Security

Secures academic digital infrastructure and protects sensitive student data in educational environments.

Enterprise Automation

Offers automation and consistency for large enterprises managing distributed devices and complex structures.

Conclusion

Closing Summary

Comprehensive Governance Solution

IPM+ offers a scalable and automated approach to enterprise governance with a vast policy library.

Real-Time Auditing and Support

Supports cross-platform real-time auditing to maintain strong security and reduce manual effort.

Dashboards and Remediation

Dashboards enable board-level visibility; remediation frameworks ensure a self-healing governance environment.

Empowering Compliance Maturity

Enables organizations to confidently navigate evolving regulations and improve compliance maturity.
